

WWI Activity

There are 9 sections on the webquest. Work in groups of 2-3 to complete one section of questions.

The teacher will list all sections in the board to make sure that all topics are covered and none are completed multiple times. After selecting/assigning topics spend 15-20 minutes answering the questions to help further your understanding of your topic relating to WW1.

Each group will summarize their findings in a 2-3 minute verbal presentation to the class. Before presentations begin each student should create a graphic organizer with two columns and nine rows. In the first column list the nine assigned topics that are written on the board. During presentations students should summarize key information by constructing a summary of the topic in the second column.
